***Claim Rejections - 35 USC § 112***

The rejection under 35 USC 112 is hereby withdrawn.

***Claim Rejections - 35 USC § 102/103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 4, 6, 8, 10-19 and 38 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the product Metalcrete Florundum for the reasons set forth in the office action of July 19, 2006.

It is noted that applicant has not addressed the arguments set forth by the examiner in the office action of July 19, 2006. Comments regarding this rejection will not be considered timely if they are not introduced in response to this office action.

Claims 1, 3, 4, 6, 8, 10-19 and 38 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over US 2002/0157577 to Sullivan.

The instant claims are directed to a composition comprising hydraulic cement, silica fine aggregate and honable marble aggregate chips.

Sullivan is relied on for teaching a composition containing the same components as claimed by applicant and at the point of overlapping ranges of the amounts of components, the composition is anticipated. It should be noted that the preamble recitation of "dry" can be considered to be met by the intermediate product of Sullivan, prior to slurry formation. See particularly the abstract, paragraphs [0020]-[0023], paragraph [0025], paragraphs [0029]-[0033] and paragraphs [0042]-[0045].

Alternatively, one can consider Sullivan to "differ" from the instant claims in that the final product is a slurry. However, the examiner considers that such would have been obvious because a "slurry" requires very little water, especially depending on the components of the decorative matrix and on the water content of the floor to which the composition will be applied. Additionally, "dry" is not a term with a specific definition as under most conditions, all substances will have water associated with them. Limitations regarding the marble being "honable" are considered inherent to any decorative material. The selected chips would clearly be design choice, depending on how the skilled artisan desires the final floor to look.

***Conclusion***

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
